

Cabin Lake Fire Objectives

Strategy:

- The Cabin Lake Fire will be managed utilizing full suppression strategy to include direct, indirect and point protection tactics, while providing for public and firefighter safety.
- All resources are required to engage in Life First principles of; Stop, Think, Discuss and then Act.

Incident Objectives:

- Provide for firefighter safety with thorough hazard assessment and application of sound risk management decisions and actions.
- Minimize fire impacts to private land in and around the fire perimeter. Provide structure protection as needed.
- Operational strategies on National Forest Lands should include a risk assessment identifying values at risk vs. firefighter safety and exposure.
- Cost containment commensurate with values at risk.
- Operational strategies should also consider a suite of short-term and long-term planning products.
- Manage the human resources assigned in a manner that promotes mutual respect and is consistent with the USDA Forest Service's Policy for preventing harassment.

Control Objectives:

- The overall objective for the Cabin Lake Fire is suppression of the wildfire.
- Limit further spread toward private land to the north and east, and into the South Fork drainage.
- Protect structures on the Seven Lakes Ranch and other structures to the north and east of current fire perimeter.
- Guide fire progression to the south flank as much as possible.
- Use suppression tactics that are commensurate with the values at risk.
